# N1 Vision

## Autonomic Computing

In a separate statement

## Organic IT

The Next Computing Revolution | Technology Leadership Forum. Industry experts believe that this new architecture, which is based on IT, will address the needs of both IT and business.

## GRID COMPUTING

of the power grid, and the wipeout of vast data reserves. It's just a matter of time before industrial and power reserves

## Real Time Infrastructure

US legislation likely to be considered elsewhere that seeks to guard against corporate fraud, may have arisen from financial scandals such as Enron and WorldCom, but it could just as well have been born in the heyday of the storage and document management companies. HP had

## On-Demand

March 16, 2005

About three weeks after corporate computers and networks were hit by the Sasser computer virus and the Internet

## Dynamic Systems Initiative

Applications versus Business Process Management | Business Carr's article is about functional applications

## Enterprise Grids

will make serious use of the power grid, and the wipeout of vast data reserves. It's just a matter of time before industrial and power reserves

## Utility Computing

A flood of corporate data, intensified by stock market implications, is driving efficient, flexible computing infrastructure

## Dynamic IT

of the power grid, and the wipeout of vast data reserves. It's just a matter of time before industrial and power reserves

## Adaptive Enterprise

Organic Computing, a service, provides daily letters in California, is organizing a staff conference to attend Congress and the

pages to attend Congress and the White House that this fall's election is at stake. The president of the California

# Matching Workload with Resources in Accordance with Policy

# N1 Definition

Software and services for lifecycle management of business services and infrastructure

# Compute-Intensive Grids

---

Widely deployed

---

Verifiable benefits

---

Emerging standards

---

Many implementation choices

---

# Other Grids

---

Early adoption only

---

No consensus on definitions

---

Incomplete stack/architecture

---

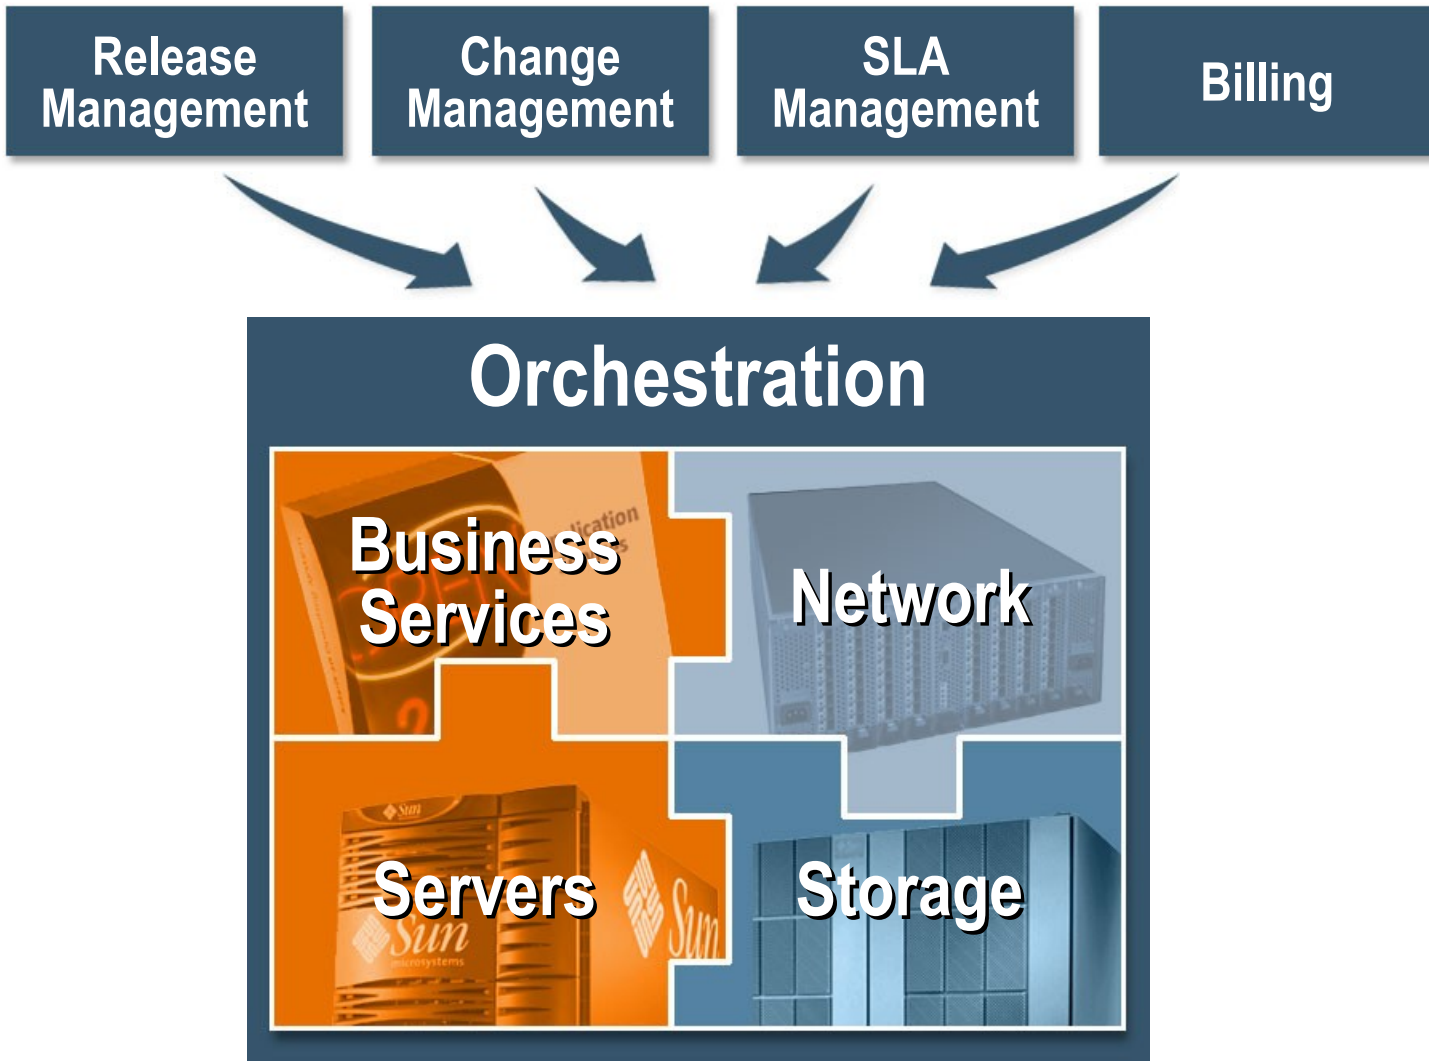

Organizational inhibitors
